

H-RIP PLATE CARRIER

The H-RIP (High Risk Incident Plate Carrier) was designed for the Law Enforcement / Military Professional as a robust, load bearing tactical plate carrier. It is constructed with 500D Cordura Nylon and fits all hard armor plates for sizes 9.50"x12.50" and 10"x12."

The Bar-Tacked MOLLE webbing encompasses the entirety of the plate carrier providing ample surface to attach external load bearing pouches. The front cummerbund flap is secured to the plate bag via hook and loop and buckles and has a removable triple AR Magazine Shingle. The H-RIP can accept aftermarket front MOLLE MAP so long as the aftermarket MOLLE MAP has a 1" male buckle.

The upper front portion behind the loop Velcro has a hidden pocket that can be opened from either side. This pocket can safely store a large cell phone or any other object of a similar size.

The adjustable cummerbund is secured to the front plate bag via First-Spear TUBES™ for quick donning and doffing. The rear portion of the cummerbund is secured to the rear bag via a double layered 4" wide elastic that allows the cummerbund to expand and contract with the user's body.

The H-RIP Plate Carrier is Berry Amendment Compliant - Made in the USA.

AVAILABLE COLORS:

- Black
- Coyote
- Ranger Green
