

**AS500
LEVEL III BALLISTIC SHIELD**

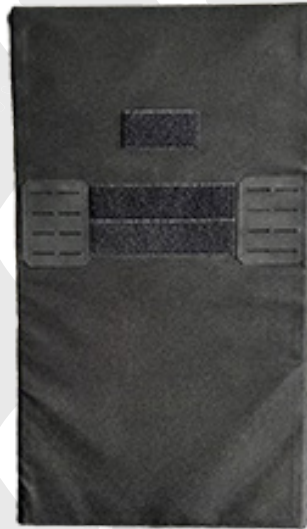

The AS500 Level III (Rifle Resistant) Ballistic Shield is a lightweight, compact and portable shield that can be easily stored in vehicle compartments without occupying much space.

The ballistic panel is encased in a heavy-duty nylon sleeve that incorporates reinforced sewn-in ambidextrous handles that are strategically positioned for proper ergonomics.

This unique design allows the operator to position the shield for optimal coverage when deployed. The shield also has a removable laser cut MOLLE Map to attach external load bearing pouches such as our battery pouch for the Fox Fury Taker B30 Shield Light. It also has two laser cut MOLLE frames on the front side of the shield to attach body worn cameras or any other MOLLE compatible items.

BALLISTIC COMPOSITION:

UHMWPE with full perimeter Trim-Lock and Polyurea Coating.

SIZE:	WEIGHT:	BALLISTICS:
