

# PROTECTOR I LEVEL III BALLISTIC SHIELD

The Protector I Level III (Rifle Resistant) Ballistic Shield is expertly shaped and balanced for tactical engagements. Indents on either side allow the operator to properly present a firearm and quickly acquire sight.

The ballistic panel, made from 2.8 PSF DSM Dyneema® material, provides superior resistance against modern handgun and non-armor piercing rifle threats. The 3"x8" ballistic viewport offers lateral and perpendicular sight awareness.

All ballistic bolts and washers are crafted from high-hard ballistic steel (Ramor 600) and reinforced through the panel, enhancing its integrity during angular impacts. The Protector I panel features a non-reflective matte finish and high-impact edge areas encased with securely fastened Trim-Lok.

**Ballistic Composition:** 100% DSM Dyneema®

**Handle Options:** Wide Grip – No Light  
DFNDR Light Handle  
Fox Fury Taker B30 Light Attachment

**SIZE:**

20"x30"
