

RIFLE MOUNT SHIELD (RMS) LEVEL III BALLISTIC SHIELD

The Rifle Mount Shield is shaped to optimize pistol or long gun deployment. Its compact design and lightweight allows the operator to deploy the shield during long durations. The operator can easily mount a long gun by resting it on the designated mount on either side – ideal for solo Officer response.

All the ballistic bolts and washers are made from a high hard ballistic steel (Ramor 600) and are reinforced through the panel increasing its integrity during an angular impact.

The Patrol Response Shield is coated with a non-reflective matte finish and the perimeter is encased with Trim-Lok that is securely fastened.

Ballistic Composition: UHMWPE with full perimeter Trim-Lock and Polyurea Coating.

Handle Options: Wide Grip – No Light
Fox Fury Taker B30 Light Attachment

SIZE:	WEIGHT:	BALLISTICS:
